

Need:

Paper plate

Construction paper— Red, Green and Brown

Glue

Now you are ready: First, have your child tear up the red construction paper. You may have to show them how to do this depending on their age. If they have a little more coordination, you may let them use child proof scissors to cut the paper. Then glue the red pieces all over your plate. Last they will need a leaf and a stem. Parents, you can help them with this if they need it.

\*\*OR, you can go outside and have them find a leaf and a small twig.
